TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python, SQL
- **Frameworks:** Spring Boot, Spring Security, Hibernate, REST APIs
- **Tools & Technologies:** Postman, Git, GitHub, Linux, IntelliJ, Github Copilot, Claude, MySQL
- **Relevant Coursework:** Database Management Systems, Object-Oriented Programming, Data Structures and Algorithms, Software Engineering
- **Areas of Interest:** Backend, AI/ML, GenAI, LLM, RAG, Prompt Engineering, Startups

EDUCATION

- **Chandigarh University** Mohali, India
Bachelor of Engineering in Computer Science and Engineering; CGPA: 7.5/10.0 July 2022 - Present

EXPERIENCE

- **Backend Engineer Intern** Apr 2025 – Jun 2025
Catination Ventures (Remote)
 - Fixed bugs and added new features to improve system functionality.
 - Worked end-to-end with frontend and backend teams for delivery.
 - Raised and reviewed PRs on GitHub, maintaining code quality.
 - Enhanced performance and resolved integration issues across modules.

PROJECTS

- **Employee Management System:**
 - Developed a strong foundation in **Core Java**, implementing **object-oriented programming principles**.
 - Optimized data handling and performance by applying **Java Collections** and integrating **JDBC** for efficient **MySQL** database interactions.
 - Designed and built **RESTful APIs** with **Spring Boot**, leveraging **JPA** and **Hibernate** for seamless data persistence and optimized backend performance.
 - Followed the **MVC architecture** to create a modular and maintainable codebase

OTHER PROJECTS

- **ClickNShop E-Commerce Platform:**
 - Built a full-stack e-commerce site using a **Java/Spring Boot** backend with RESTful APIs.
 - Created a dynamic frontend with **HTML, CSS, & Thymeleaf** for product, cart, and admin views.
 - Managed product data via full **CRUD** operations, utilizing an **H2 in-memory database**.
 - Integrated the **Razorpay API** to enable secure and seamless user payment processing.

ACHIEVEMENTS & CERTIFICATIONS

- **LeetCode:** Solved 100+ problems on LeetCode, focusing on Data Structures and Algorithms. [Profile Link](#)
- **Core Java:** Gained a strong foundation in Core Java and OOP principles through hands-on projects. [Certification Link](#)
- **Spring Boot 3, Spring 6 & Hibernate:** Completed a comprehensive course covering Spring Boot 3, Spring Security, JPA, and Hibernate. [Certification Link](#)
- **Introduction to Relational Databases (RDBMS):** Learned Database Design, RDBMS, and MySQL fundamentals. [Certification Link](#)
- **Complete Git and GitHub:** Acquired skills in Git basics, branching, merging, and collaboration. [Certification Link](#)
